PERFORM.

PROTECT.

GROW.

FROM £20 / MONTH

techwonders.co.uk

Hosting backed by real expertise.

Technology, protection and direct access to people who understand the platform.

“

Your website should feel like an asset - not another technical problem to manage.

TechWonders removes the technical burden, so your team can focus on customers, sales and the next stage of growth.

10+ YEARS OF EXPERIENCE

Performance engineered

Modern AMD infrastructure and layered caching reduce page delivery time and database load.

Proactive protection

Server hardening, Imunify360, daily backups, SSL and continuous platform monitoring.

Direct, real support

Speak to the people who built and manage the platform, not a generic call centre. Managed and Growth receive a 2-hour response during business hours.

Choose the relationship that matches your business.

From a website that simply needs looking after to a store or agency that needs technical depth.

BUSINESS WEBSITE

“I just want it looked after.”

Reliable hosting, proactive maintenance and a trusted technical partner who keeps your website running smoothly.

WOOCOMMERCE STORE

“My online store cannot afford downtime.”

Fast checkout, plugin compatibility, inventory integrations and ongoing optimisation for growing online stores.

AGENCY

“I need someone technical behind the scenes.”

Infrastructure, troubleshooting and development support without another generic host.

GROWING BUSINESS

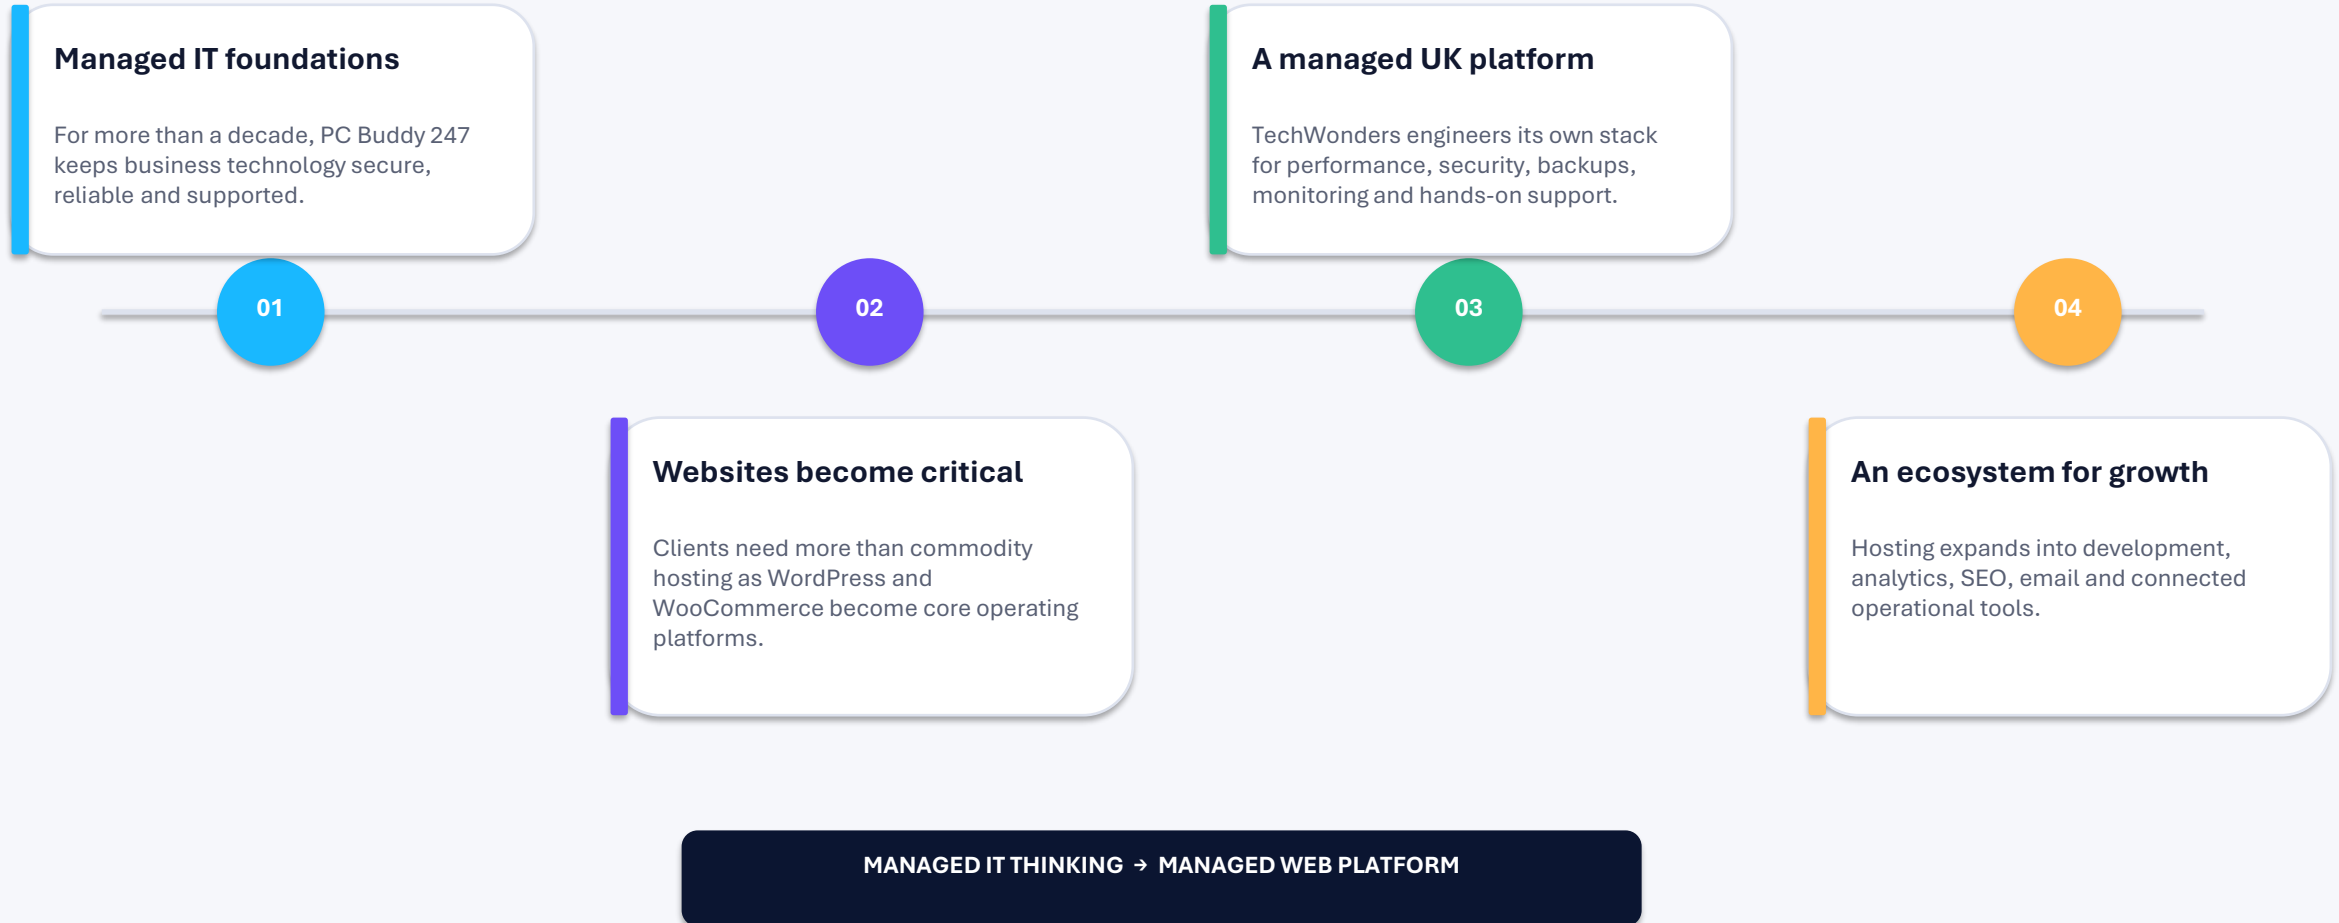

“I want one company managing everything.”

One trusted partner for hosting, email, analytics, SEO, integrations and ongoing technical improvement as your business grows.

START WITH THE OUTCOME YOU NEED - THEN CHOOSE THE PLAN

Built from the problems our clients brought us.

A managed IT mindset, applied to business-critical WordPress and WooCommerce.

A host gives you space. A partner takes responsibility.

The value is not only in the server - it is in what happens when something needs attention.

TRADITIONAL HOSTING

Server space and a control panel

- Updates are yours to coordinate
- Plugin conflicts are passed back to you
- Performance tuning requires another supplier
- Support ends at the edge of the server

THE TECHWONDERS MODEL

One accountable technical partner

- The platform is proactively maintained
- Conflicts are investigated, not redirected
- WooCommerce performance is understood
- Advice connects today's issue to tomorrow's plan

HOST

MANAGE

GROW

WE DON'T JUST HOST - WE BECOME YOUR TECHNICAL PARTNER

Dedicated UK infrastructure with room to perform.

A high-frequency AMD platform in London, managed through Plesk and proactively optimised.

London server

Dedicated UK infrastructure using high-frequency modern AMD architecture.

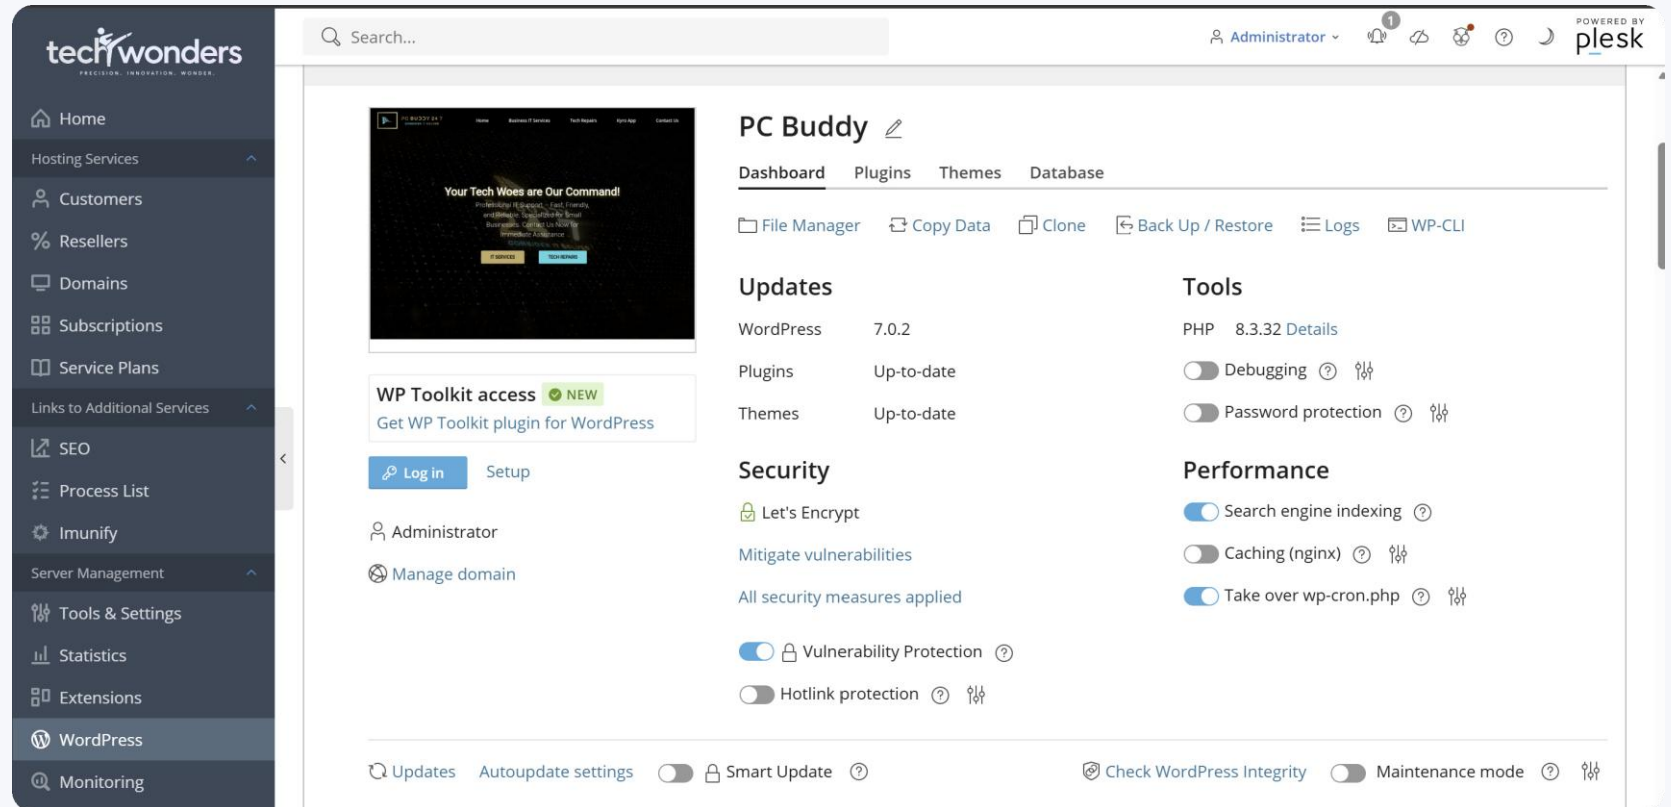

Plesk management

WP Toolkit, monitoring, updates and recovery workflows in one place.

WooCommerce ready

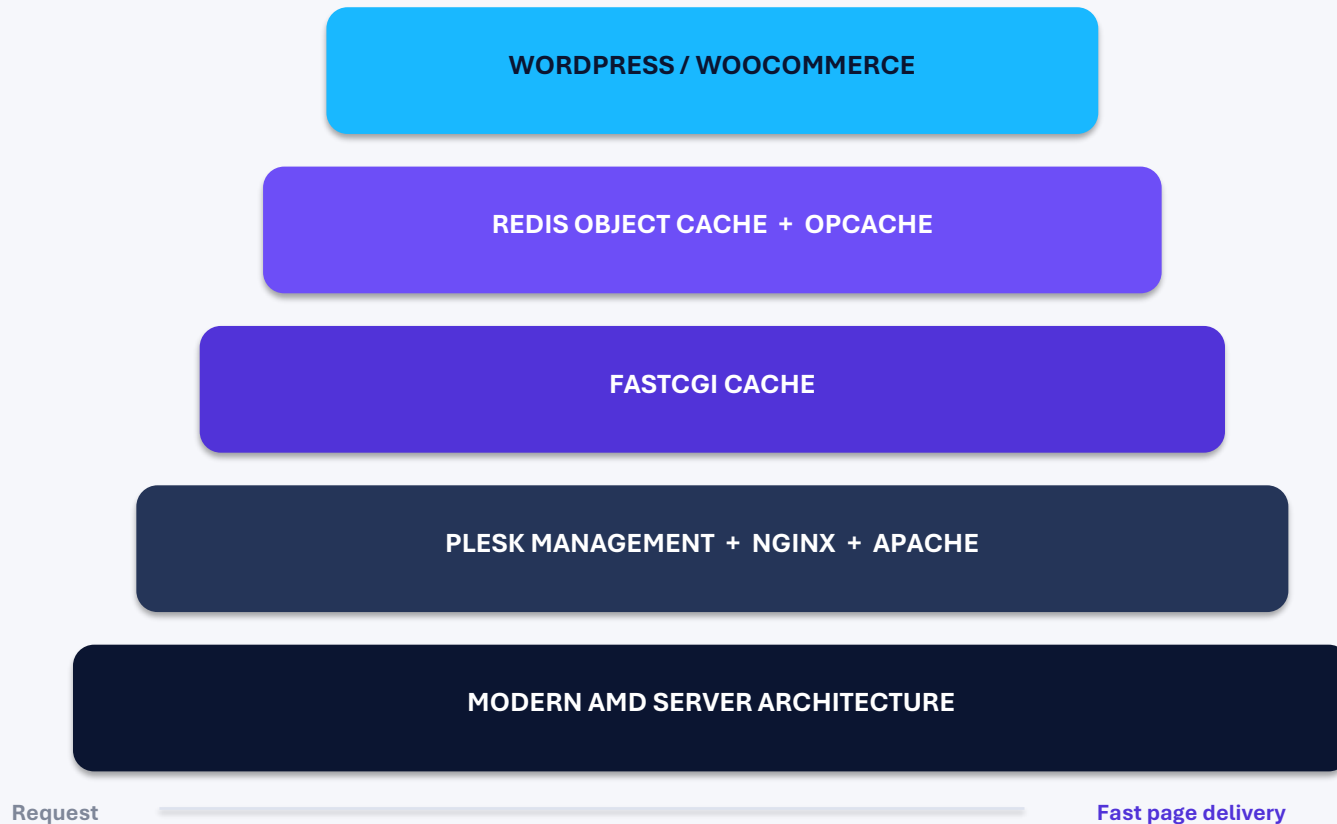

Resources are tuned for product catalogues, checkout activity and higher order volumes.

ONE CAREFULLY ENGINEERED PLATFORM • NO EXTRA CACHING OR SECURITY PLUGINS REQUIRED

Performance for websites and WooCommerce stores.

Each layer removes friction before it reaches a visitor, checkout or database.

WHAT THIS CHANGES

- 1 Pages and catalogues load faster**
Cached responses avoid unnecessary processing.
- 2 Checkout stays responsive**
Dynamic cart, checkout and account flows remain uncached and available.
- 3 Resources stay optimised**
Platform resources are tuned and reviewed to maintain useful headroom.
- 4 Store tweaks become specific**
Managed and Growth include WooCommerce compatibility and performance tweaks.

CORE STACK ON EVERY PLAN

Protection is layered before a threat reaches WordPress.

Core safeguards are built into the platform; WP Guardian adds virtual patching where required.

CORE PLATFORM

CONTINUOUS MONITORING

DAILY SERVER BACKUPS + SSL

WP TOOLKIT • INTEGRITY • UPDATES

IMUNIFY360 PROTECTION

SERVER HARDENING

Included on every plan

- Imunify360 and server hardening
- Daily automatic server backups, SSL and monitoring

WP Guardian

Powered by Patchstack

Virtual patching helps reduce exposure to known vulnerabilities while updates are being applied.

Action Plan
Target post: page - #18 - View page - Edit in WordPress

Update SEO title H1P · SEO · TITLE
Replace the current title with a keyword-led version that leads with 'IT Support Scurthorpe' and adds the brand name. *Already matches live*

Update SEO meta description H1P · SEO · DESCRIPTION
Replace the vague current meta with a version that includes concrete differentiators and a phone CTA. *Already matches live*

INSIGHT → ACTION → IMPROVEMENT

GROWTH

£125 WP / £175 WOO

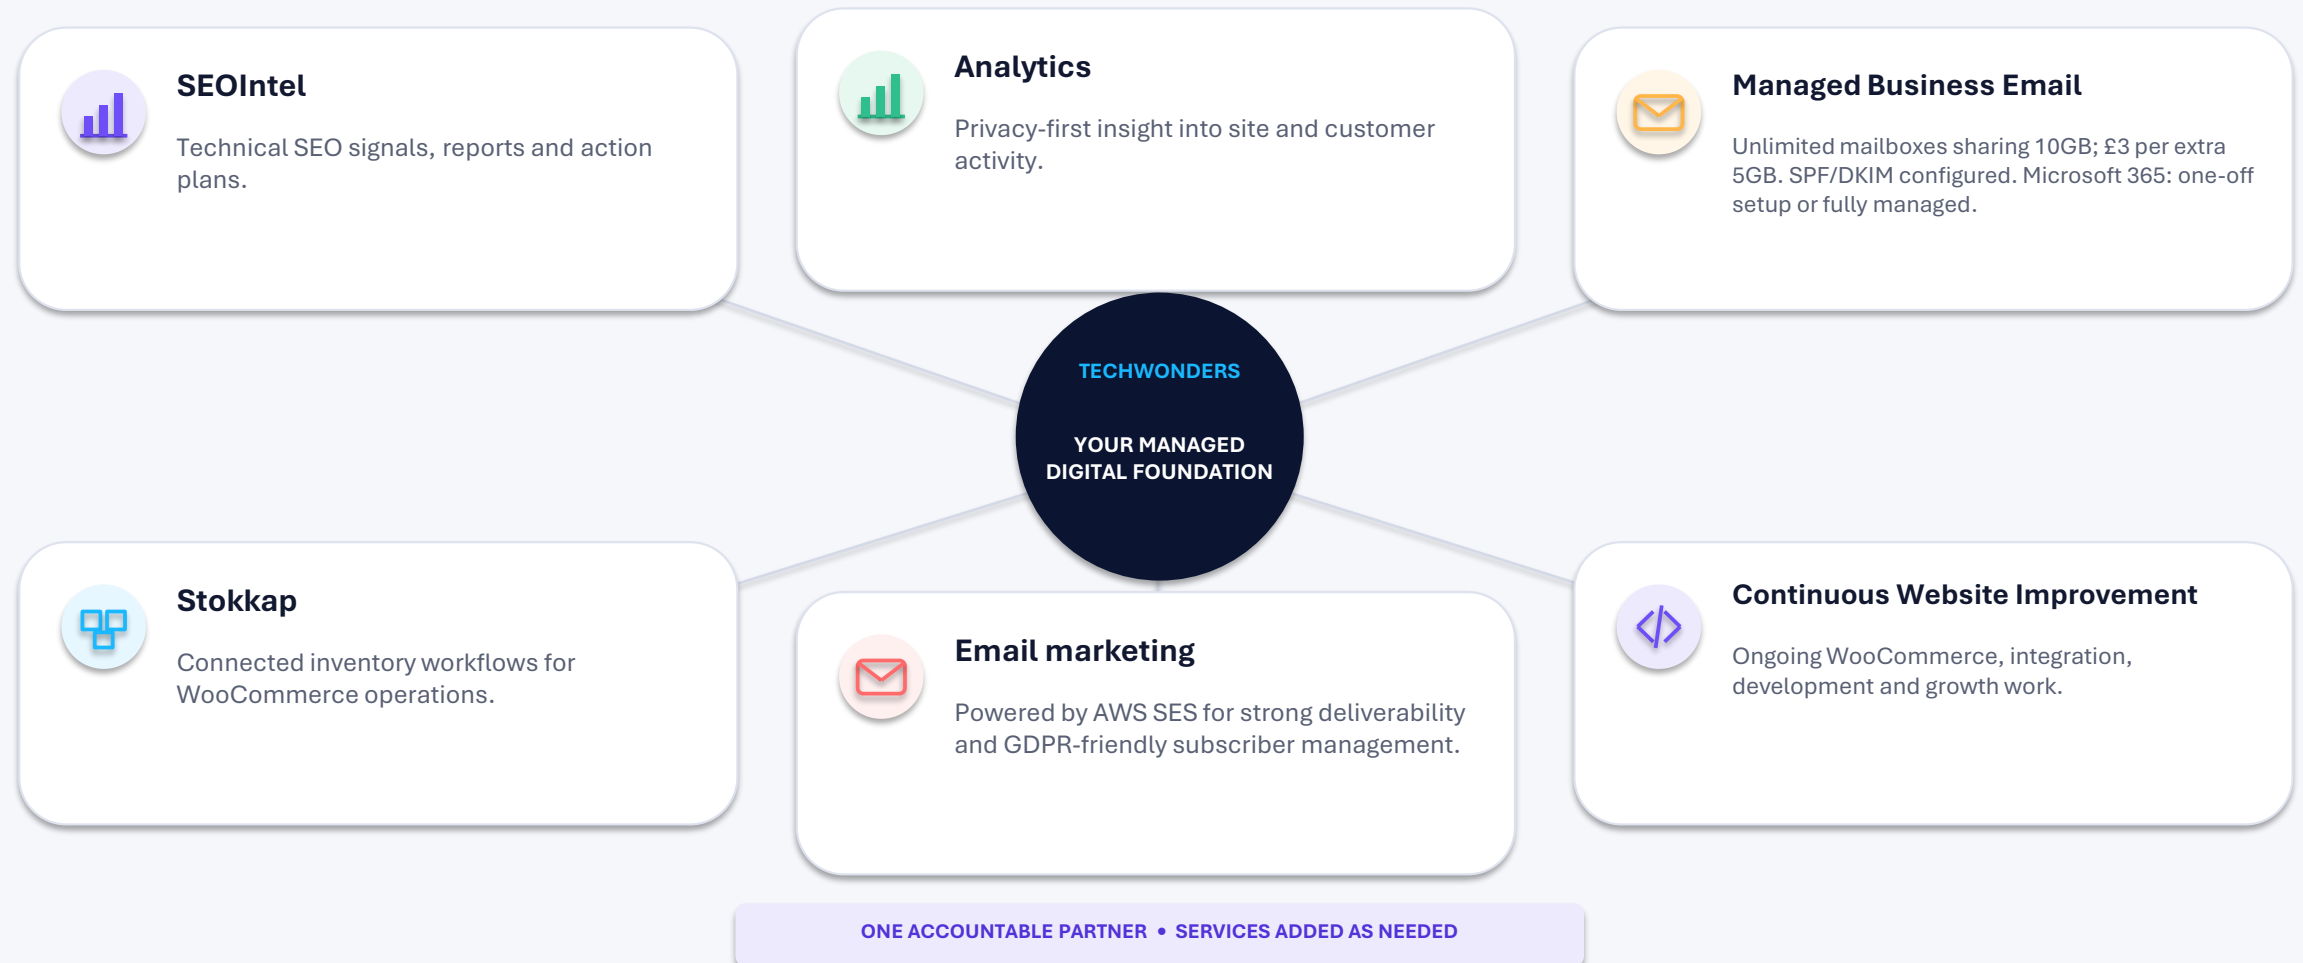

EVERYTHING IN MANAGED, PLUS

- 2 improvement hours every month
- WooCommerce store growth
- SEOIntel reporting
- Strategy and technical guidance
- WP Guardian included

Additional improvement/development time can be purchased.

One technical foundation. More ways to grow.

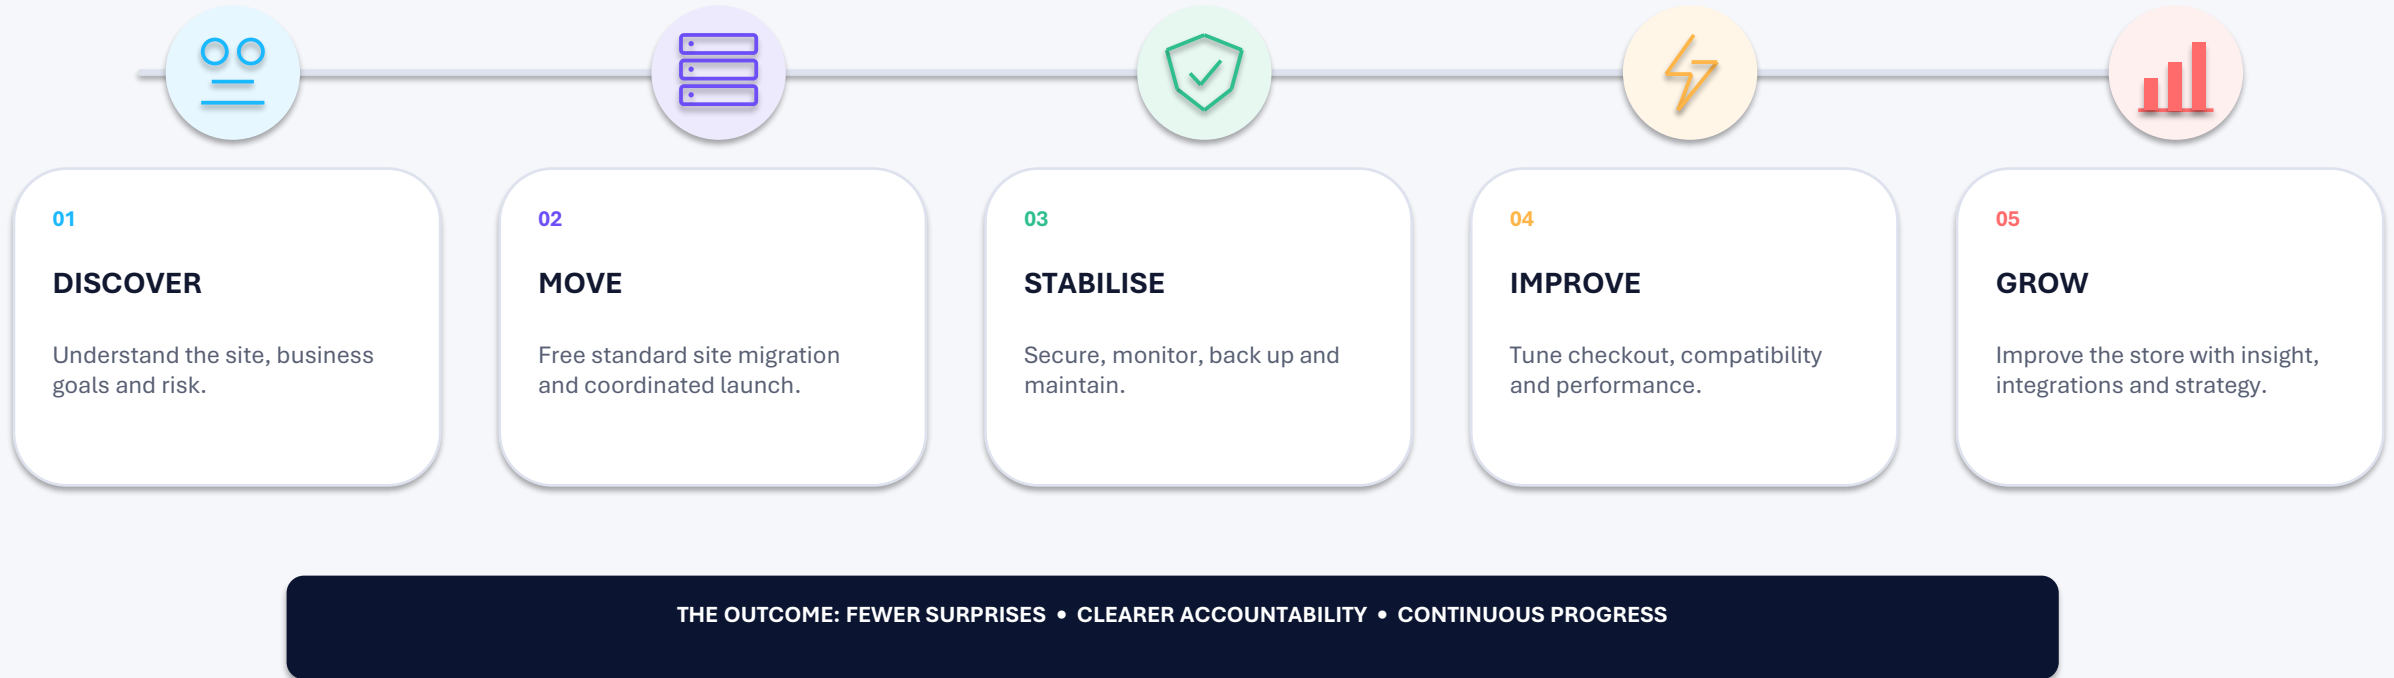

Connect the services you need without creating a patchwork of disconnected suppliers.

From first move to long-term technical partnership.

A simple journey with more responsibility taken off your team at every stage.

“We don't just host - we become the technical partner behind your website.”

A clear move. A clear service. No surprises.

What is included, when additional work is scoped, and how your website data is protected.

Free standard site migration

- One WordPress or WooCommerce website included
- Up to two email mailboxes included after review
- Domain DNS management and coordinated launch included

Complex migrations are scoped

- Every migration is reviewed and confirmed first
- Extra emails, large mailboxes or high storage may cost more
- Custom applications and integrations quoted separately

Layered backup options

- Daily server backups; at least two full backups available
- Restores included; WordPress backups can run more often
- Dedicated third-party off-server storage can be configured

Straightforward commercial terms

- No VAT is added; TechWonders is not VAT registered
- Monthly in advance or save up to 20% annually
- Plugin licences and domain registration/renewals excluded

MANAGED & GROWTH PRIORITY RESPONSE

Within 2 hours, Monday-Friday, 8am-6pm

Maintenance includes standard business-hours support. Monitoring remains active for urgent alerts; out-of-hours responses are best-effort and not guaranteed.

Trusted by customers across the UK.

Long-term relationships built across managed IT, websites, WooCommerce and business operations.

CURRENT MONITORED UPTIME

CLIENT PERSPECTIVE

Daniel has supported me for many years. He initially provided IT Support then took over our website, helped us convert it to WordPress and move it onto the TechWonders server. He has also integrated WooCommerce and WordPress solutions that support our day-to-day business operations and marketing.

KAY

Balnecroft Country Store

WHY CLIENTS STAY

- Long-term relationships, not anonymous ticket queues
- Full-stack IT, web and WooCommerce support
- Direct access to the people behind the platform
- UK-wide service with personal accountability

99.91% is the current figure from live uptime monitoring at the time of publication and may change.

Meet Daniel Nguyen.

The person behind the platform, the technical decisions and the long-term client relationships.

FOUNDER • PC BUDDY 247 • TECHWONDERS

DANIEL NGUYEN

More than a decade of hands-on technical experience.

Daniel founded PC Buddy 247 and built the TechWonders hosting platform after seeing the same problems repeatedly: slow websites, fragmented suppliers and generic hosting support that stopped at the edge of the server.

His experience spans managed IT, WordPress infrastructure, WooCommerce development, backup and recovery, SEO and business systems. Clients work directly with the people responsible for the platform and the solutions behind it.
